

SHAMBHAVI

B.Tech Computer Science Engineering Student

Vijayawada, Andhra Pradesh, India | 9204144857 | shambhavimahi23@gmail.com | linkedin.com/in/shambhavi-mahi | github.com/shambhavi-mahi

PROJECTS

Smart Career Guidance Platform | [GitHub](#)

2026

Python, Typescript, Flask, PostgreSQL, HTML, CSS, JavaScript

- Designed a full-stack platform enabling students to make informed academic and career decisions by unifying 3 core modules — career exploration, college guidance, and learning roadmaps — into a single, scalable dashboard.
- Architected a personalized recommendation engine (Python) that generates tailored career paths, college suggestions, and skill roadmaps, integrated with a curated feed spanning internships, courses, and competitions.

SIH 2025 – Digitizing Monasteries of Sikkim for Tourism

2025

Python, Flask, Web Development, Prompt Engineering | Smart India Hackathon 2025

- Established a full-stack web platform for the Government of Sikkim to digitize and showcase the state's monasteries, driving tourism promotion and cultural preservation across the region.
- Applied prompt engineering techniques to auto-generate structured monastery content at scale and built a RESTful Flask backend to serve monastery data, media, and geolocation details.

Sports Analytics Dashboard | [GitHub](#)

2025

Java, PostgreSQL, JavaScript, HTML, CSS

- Created an interactive full-stack dashboard delivering player performance analysis, team comparisons, and data-driven visual insights derived from match data.
- Executed filterable, query-driven data views backed by an optimized, normalized PostgreSQL schema for fast, efficient player-vs-player statistical comparisons.

Smart Garbage Collection System | [GitHub](#)

2025

Python, Flask, PostgreSQL, HTML, CSS, JavaScript

- Initiated a smart-city waste management system that used real-time bin data to optimize collection frequency and collection scheduling using real-time bin data, reducing unnecessary collection runs by 20%.
- Developed a full-stack admin dashboard for multi-zone monitoring and applied an automated real-time alert system to flag near-capacity bins.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Frontend: HTML5, CSS3, Tailwind CSS, React.js, Responsive Web Design

Backend: Flask, Spring Boot, Node.js, Postman, RESTful APIs, MVC Architecture, Testing, API Testing

Databases: PostgreSQL, MongoDB, Database Design, Query Optimization

Core CS: Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networks, System Design

Developer Tools: Git, GitHub, VS Code, PyCharm

Embedded Systems & IoT: Embedded Systems, Internet of Things (IoT), Sensor Integration

EDUCATION

Koneru Lakshmaiah Education Foundation, Vijayawada

2025 – 2029

B.Tech in Computer Science and Engineering | CGPA: 9.64/10

ACHIEVEMENTS

- Solved 500+ data structures and algorithms problems across multiple competitive coding platforms.
- Achieved a rating of 1854 on CodeChef (4-star), solving 200+ problems and reflecting strong competitive programming and problem-solving skills.
- Solved 100+ problems on LeetCode across data structures and algorithms topics.
- Selected as 1 of a national cohort to represent at Smart India Hackathon (SIH) 2025; built a full-stack web platform for the Government of Sikkim to digitize and promote its monasteries for tourism and cultural preservation.
- Active member of the RPA (Robotic Process Automation) Club, engaging in automation-focused projects and workshops.

CERTIFICATIONS

Algorithms & Computer Science: Algorithms Specialization; Data Structures and Algorithms Specialization; Advanced Algorithms and Complexity; Approximation Algorithms

Machine Learning & Data Science: Mathematics for Machine Learning and Data Science; Machine Learning Introduction; Python for Machine Learning; Unsupervised Learning, Recommenders, Reinforcement Learning

Web & IoT: Front-End Development Libraries; Responsive Web Design; Introduction to Programming the Internet of Things(IoT) Specialization; Introduction to ASP.NET
